

SECA SERVICE FOR MEDICAL SCALES:

so you can focus
on providing care

Functional measuring devices – an organisational challenge for care homes

Medical scales must function precisely and reliably at all times, especially in the care sector, where accurate weight data is essential for medication dosage, mobility decisions or nutrition management. If a scale fails or measures inaccurately, it can severely disrupt day-to-day care – and in the worst case, **put residents at risk.**

Precision in medical technology protects lives.

Medical scales must be regularly maintained and checked. For many care facilities, this is a considerable organisational effort, especially if there is a lack of technical expertise and resources. Care facilities are often under financial pressure and do not employ their own in-house technicians.

That's why they need an affordable, long-term partner to maintain and repair their medical scales. This is exactly where seca comes in. We look after all makes of chair, wheelchair, lifting, flat or column scales.

Why is reverification accreditation important?

In the UK, medical scales must be officially inspected after certain periods. Only accredited service providers may carry out this legally required reverification.

seca is one of the few providers with official reverification accreditation.

This means for care facilities:

- Legal certainty for tests and inspections
- Saving time, as no additional authorities need to be involved
- Reliable service from a single source – without detours

Challenges for care facilities with medical scales

- **No fixed technical contact**
Maintenance and deadlines often end up with the care service management – in addition to the already busy daily routine.
- **Limited budget and high cost pressure**
Every service must be cost-effective and provide long-term relief.
- **No experience with test specifications**
The legal requirements are complex, so mistakes can happen quickly.
- **Maintenance must not disrupt care operations**
Residents should not be disturbed and routines in the home must continue.
- **Devices should simply work – without bureaucracy**
Care staff need reliable technology that is ready for immediate use in everyday life.

It's good to have a partner at your side who knows all these challenges and can take care of them reliably. Smooth processes, safe devices, full compliance. **We ensure accurate measurements so that you can focus on the essentials – caring for your residents.**

The full seca service for care facilities

seca manages the entire planning, coordination and **execution of the maintenance process**, so you don't have to worry about a thing. We do not let your scales out of our hands: instead of changing subcontractors, a **reverification-accredited seca service technician** accompanies you in a trusting partnership over many years.

FOR WEIGHING SYSTEMS OF
ALL TYPES AND BRANDS →

Everything from a single source

seca organises the entire process: from scheduling to carrying out the necessary maintenance work.

Trusted contact with own service fleet

Our own service technicians provide long-term support for your facility – no constant changes, no need for explanations.

Flexible and trouble-free

Reverification and calibration are carried out on site or by collection: quickly and without interrupting care operations. You don't need to worry about the details, while we keep your scales ready for use.

Keeping an eye on deadlines

seca automatically reminds you when maintenance is due, so you won't miss any more appointments and minimise your safety risk.

Service for all existing scales

We service and repair scales from all manufacturers, including body analysis scales, wheelchair and lifting scales, as well as flat scales.

We handle this for you: functioning medical technology with minimal effort

- **More time for the essentials** – We take care of the technology and deadlines.
- **Secure compliance** – Legally and manufacturer-compliant reverification with complete documentation.
- **Predictable costs** – No surprises, no emergency repairs.
- **Reliable measurements** – For more safety in care.
- **Easily integrated** – Data maintenance in existing systems.

seca: Attentive care.
Reliable service.

We are more than just a technical service provider – we are your reliable partner who ensures that your medical scales are safe, accurate and ready for use. So that you can focus on what really matters: providing the best possible care for your residents.
